

Rockbuster

Launch of New Online Video Service

Overview

Rockbuster Stealth LLC is a movie rental company that used to have stores around the world.

Facing stiff competition from streaming services such as Netflix and Amazon Prime, the Rockbuster Stealth management team is planning to use its existing movie licenses to launch an online video rental service in order to stay competitive.

The focus of this analysis is to draw insights from the existing business of Rockbuster to launch a successful campaign for the new online video service.

We would focus on existing inventory and customer trends across different categories and geographical regions to draw inferences.

The background of the slide is a dark, artistic composition featuring a large, partially unspooled film reel on the left and a clapperboard on the right. The clapperboard is tilted and shows the words 'PRODUCTION', 'DIRECTOR', and 'CAMERA' in white capital letters, followed by horizontal lines for text. The film strip is visible, showing some frames with light and dark patterns. In the top left corner, there is a small orange horizontal bar.

Key Business Questions

- Figuring out the top performing Genres.
- Does certain rated films are rented out more?
- What was the average rental duration for all films?
- Spread of Rockbuster's customers across the globe.
- Where are customers with a high lifetime value based?
- Do sales figures vary between geographic regions?

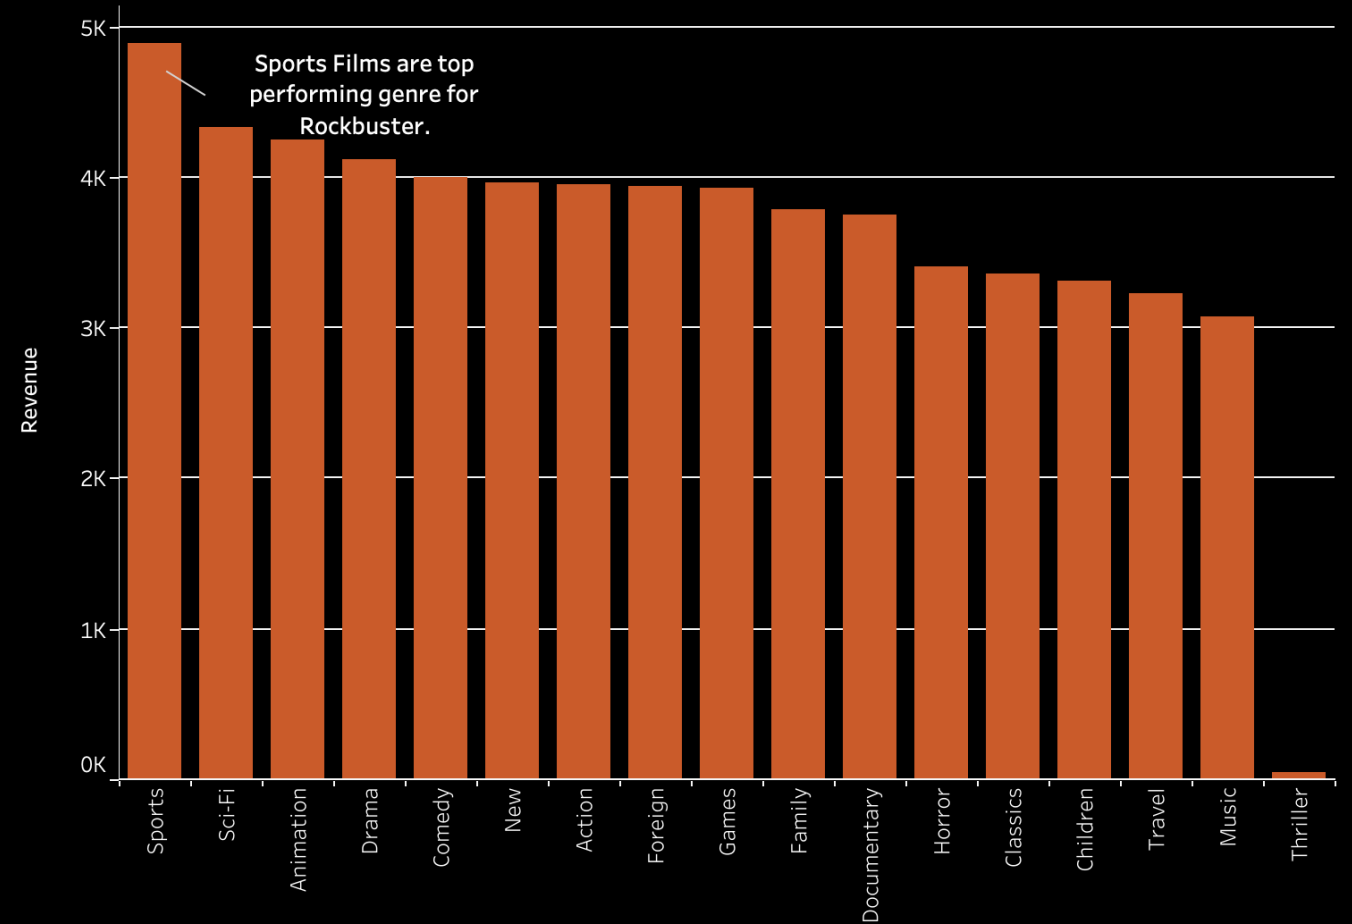

Data Limitations

Before we deep dive into the analysis, it is important to address the limitations of the database. Some of the limitations are as follows:

- All the movies in Rockbuster's database are only in one language, i.e. English. The biggest market for Rockbuster is India and China, where local languages are widely spoken. Movies only in one language are a limitation.
- The release year for all movies is 2006; either the data is incorrect, or the database contains only the movies released in 2006. Neither of which is great for business.
- The number of stores is only 2, and 599 lifetime customers. This is not a lot of data to draw inferences from for a global company.

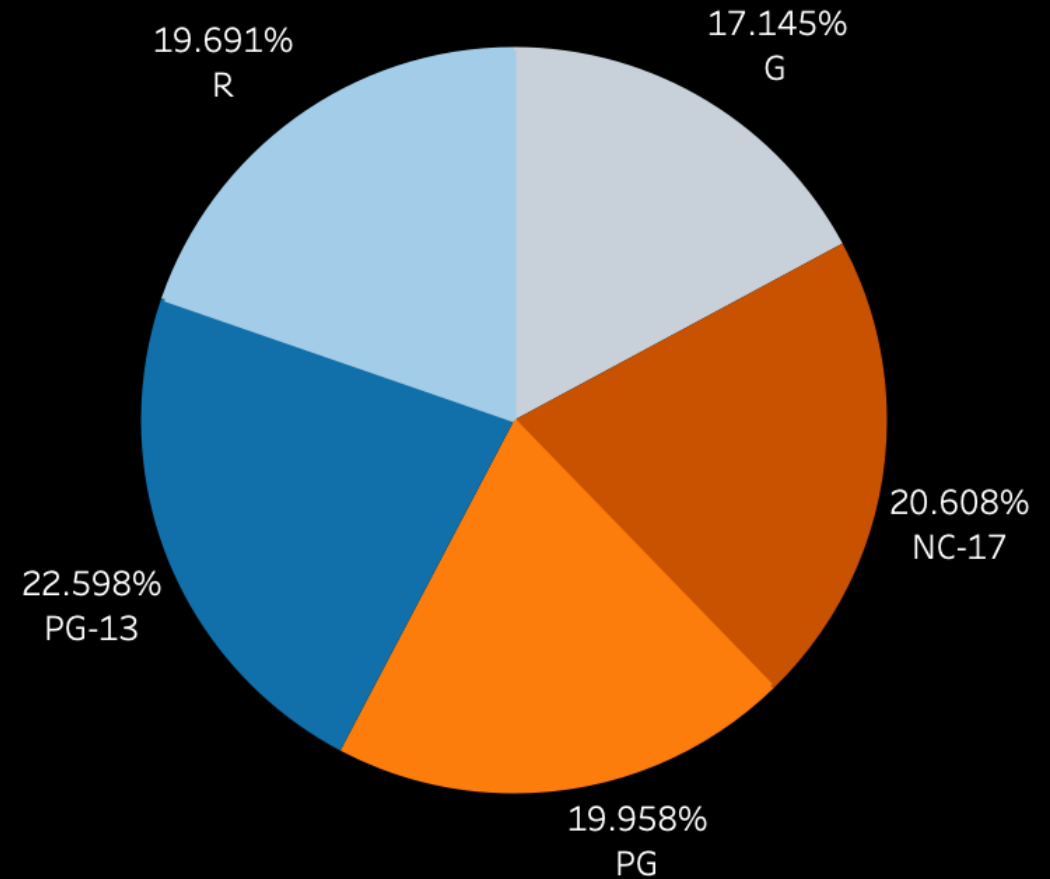

Revenue Split By Genre

- There are certain genres which perform better than the others.
- This insight will help us in advertising more popular film genres for the launch of our new online service.

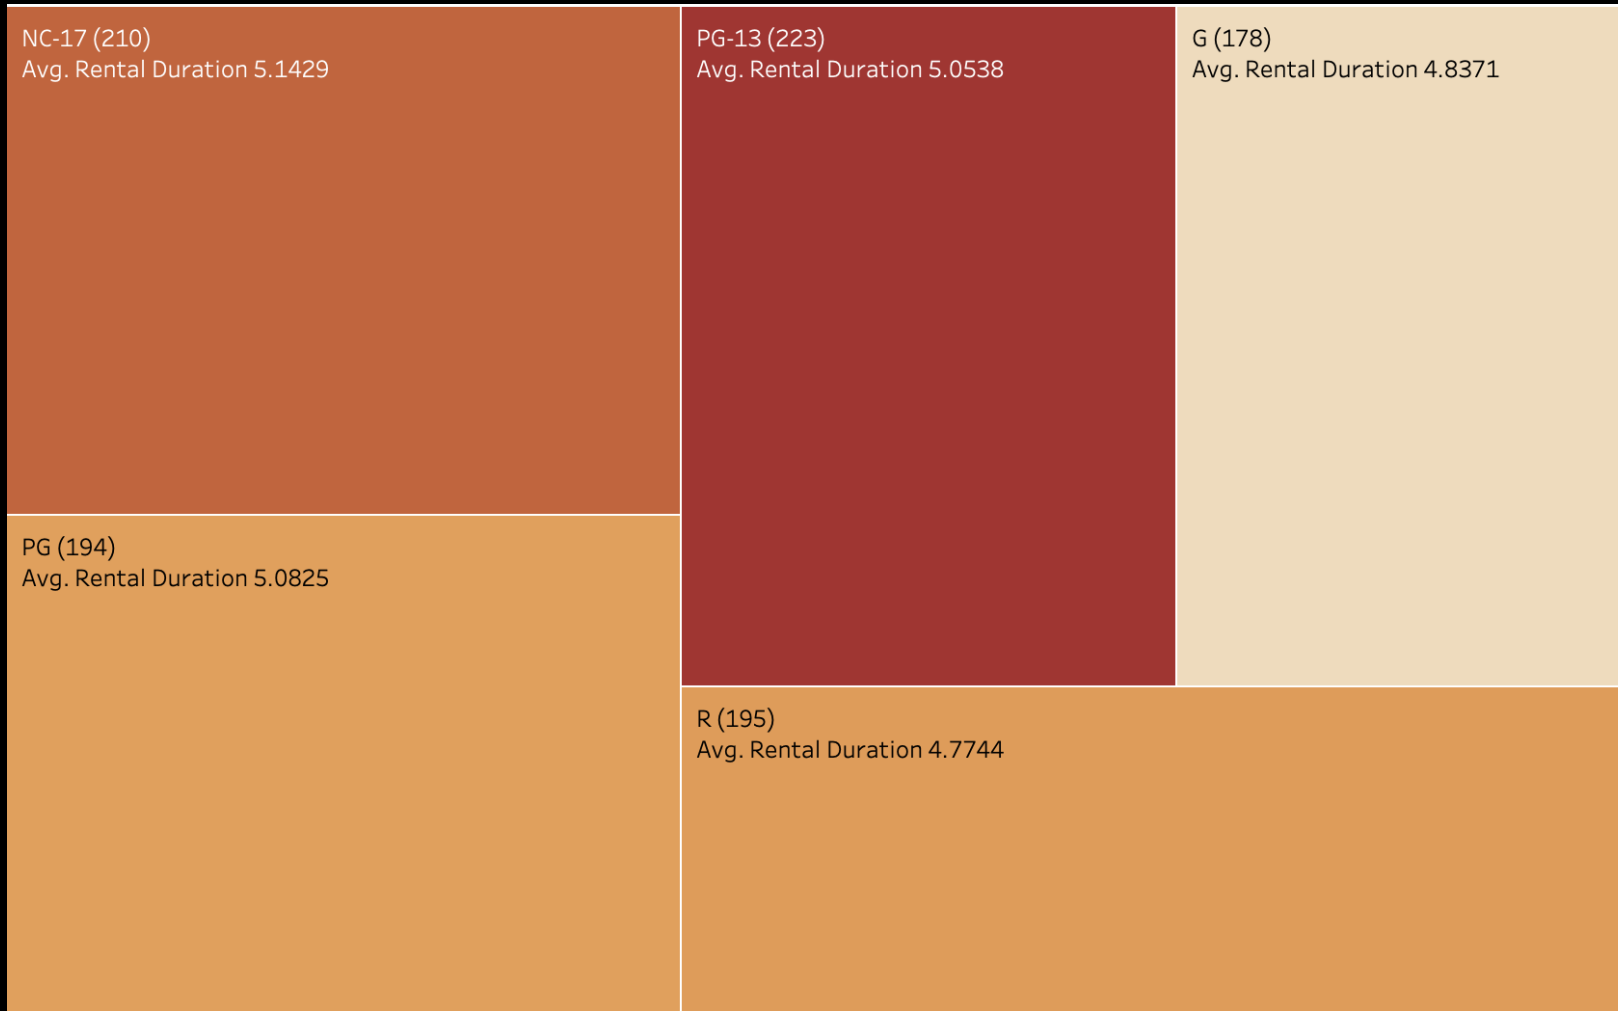

Revenue Split By Rating

The revenue split between the ratings is fairly similar, but it can be assumed that adult movies do less business than PG-rated movies.

Average Rental Duration and Inventory By Rating

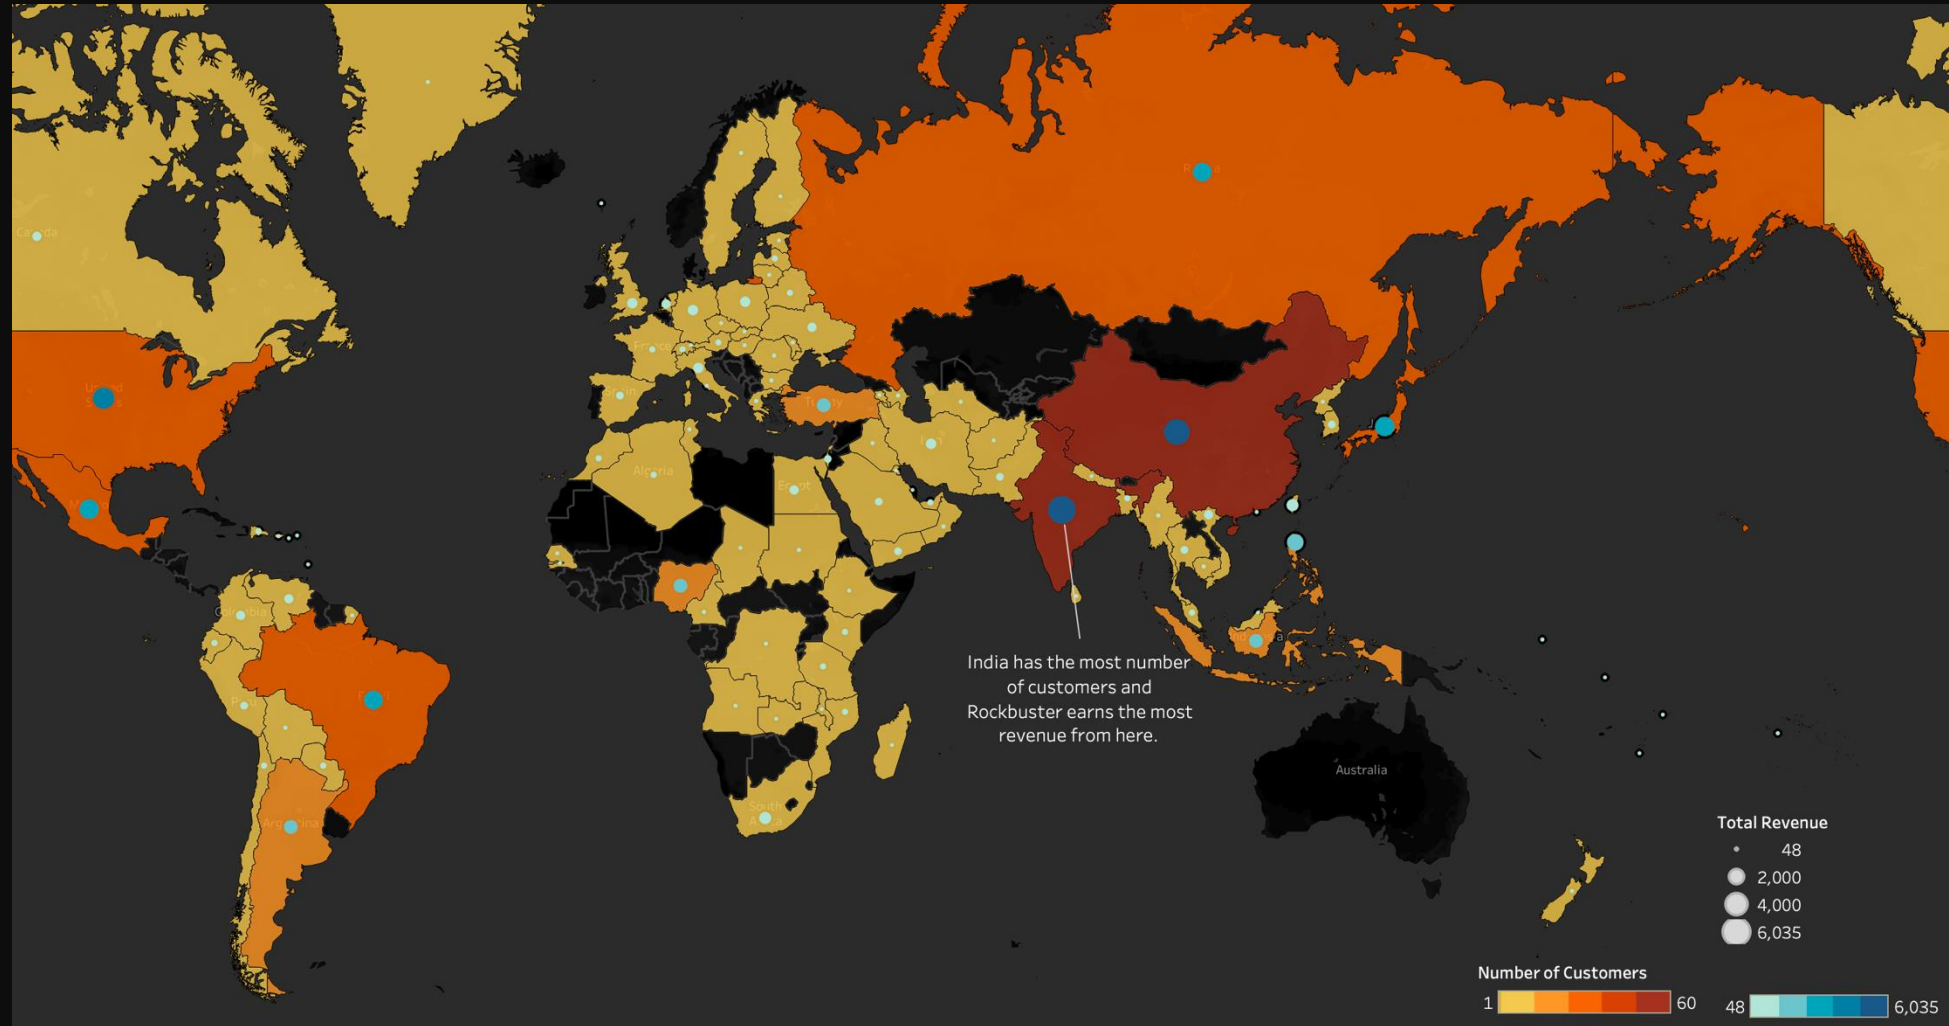

- Rockbuster Database has a higher number of PG-rated movies (as depicted in parentheses), which explains the high revenue for this category.
- This also tells us that Rockbuster needs to increase its movie collection, since inventory is directly proportional to revenue.
- Average rental duration for the NC-17 category is the highest.

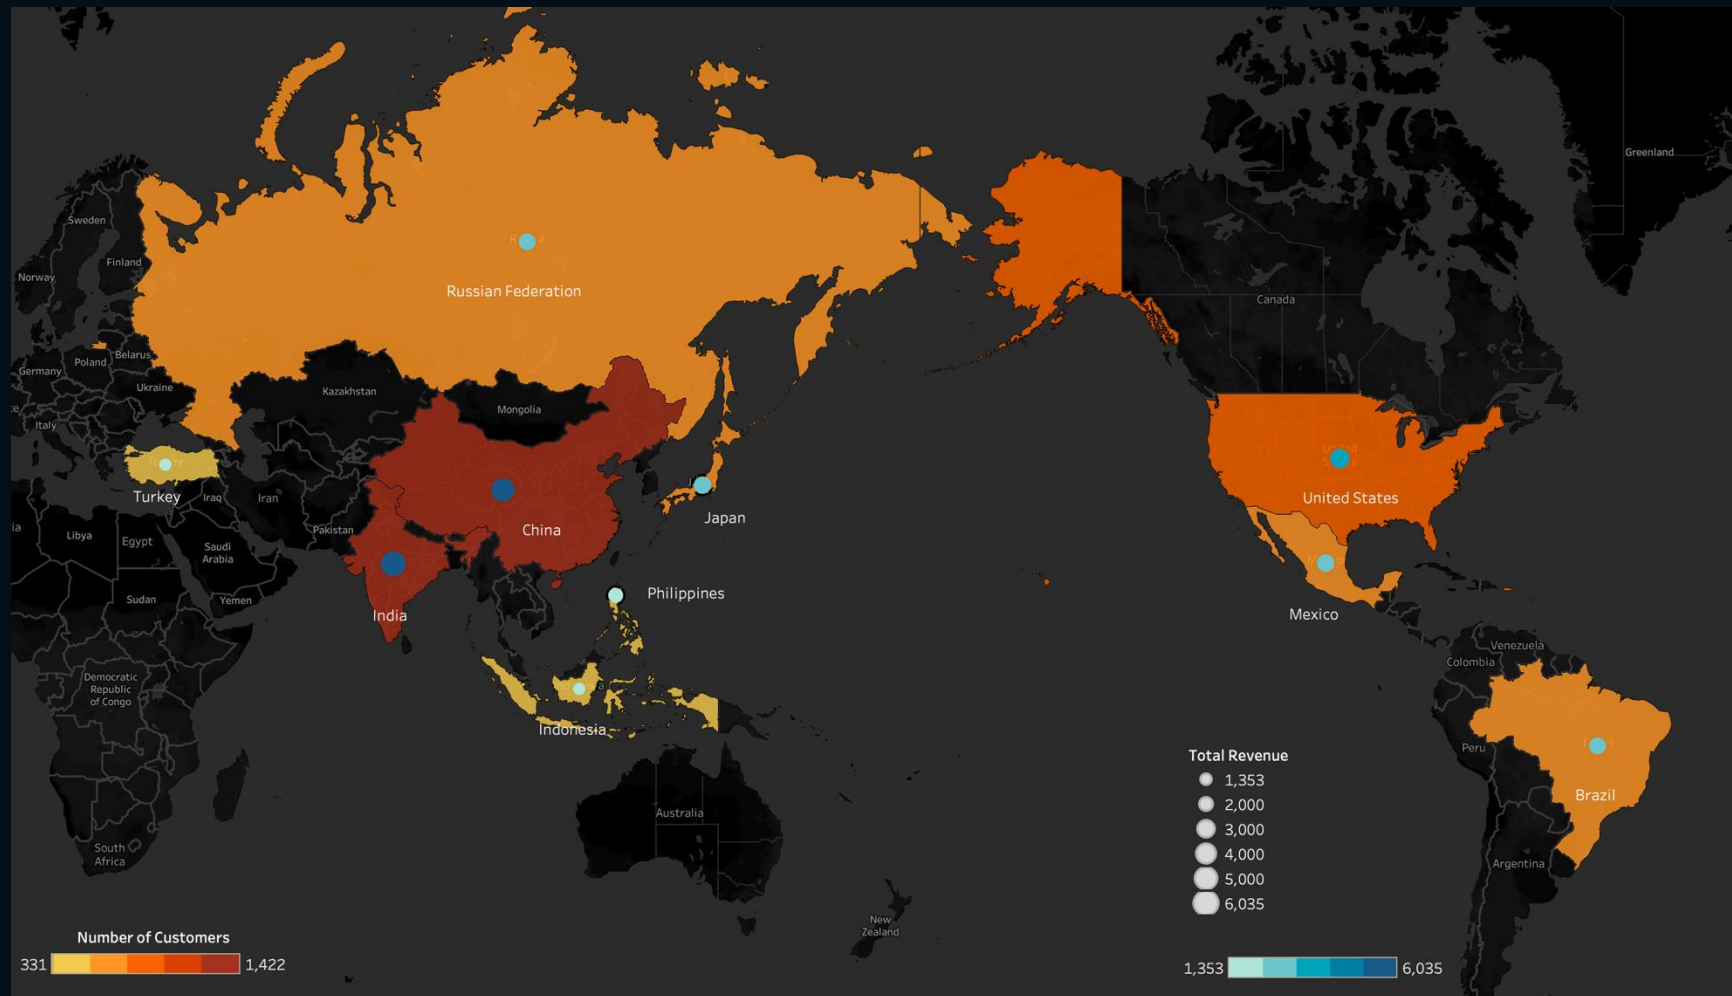

Geographical Trends

India has the largest number of clients and revenue, followed by China. Sales figures vary across the countries, as can be seen in the spatial map below. Sales figures directly correlate with the number of customers.

The launch of a new streaming service should focus on the key market areas.

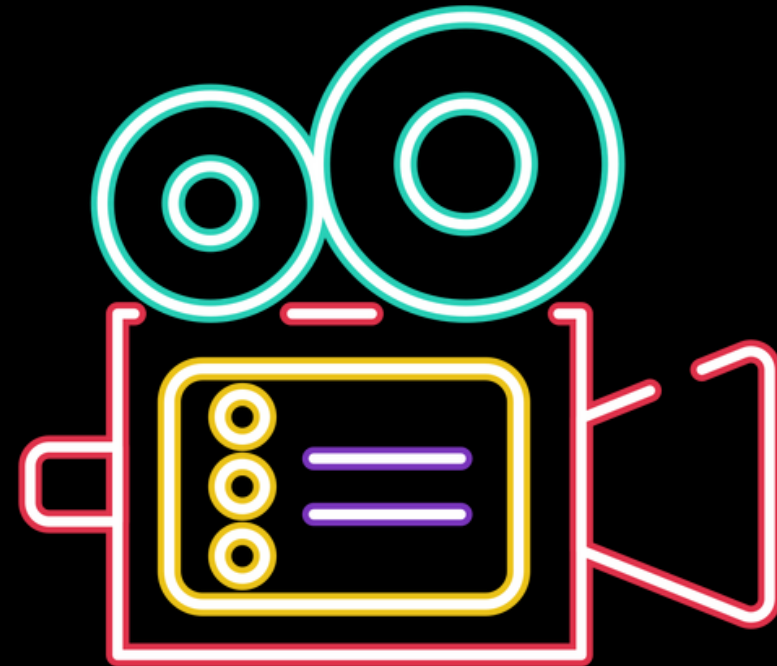

Top 10 Countries

We have shortlisted the top 10 countries for the existing Rockbuster's business.
We will focus on these countries for the launch of the new online video service.

Launch Plan

- Showcase popular genres for marketing purposes to attract customers like Sport, Sci-Fi and Animation.
- PG-rated movies do the best business, which implies our target audience is teens and families with young kids. Targeted advertising efforts for these two groups.
- 50% of the marketing budget should be allotted to the top 10 performing countries: India, China, United States, Japan, Mexico, Brazil, Russian Federation, Philippines, Turkey and Indonesia. This is to safeguard a steady income flow from the new business.
- Loyalty Program: As a reward, offer a discount and/or swag for top-paying customers to build trust and loyalty.
- Invest in building more inventory, especially for popular genres.
